PROFESSIONAL SUMMARY

Full Stack Developer and MCA graduate specializing in Artificial Intelligence & Machine Learning, with 1+ year of professional experience at Accenture in infrastructure management, automation, Linux administration, and cloud support. Promoted to Technical Lead at Uptoskills after leading a MongoDB-to-PostgreSQL migration and managing 100+ interns. Proficient in React, Node.js, Express.js, PostgreSQL, MongoDB, REST APIs, Docker, React Native, and LLM/AI integration. Google Cloud Digital Leader certified

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Frontend: React.js, React Native, HTML5, CSS3, Tailwind CSS, Zustand

Backend: Node.js, Express.js, Fast API, REST API, JWT Auth

Databases: MongoDB, PostgreSQL, MySQL

Tools & Cloud: Google Cloud Platform (GCP), AWS, Docker, Git, GitHub, Linux, ServiceNow

AI / ML: Google Gemini API, LLM Integration, AI Recommendation Systems, Prompt Engineering

WORK EXPERIENCE

Full Stack Developer Intern (Technical Lead) | Uptoskills

Feb 2026 – May 2026

- Promoted to Technical Lead after leading end to end MongoDB to PostgreSQL database migration, improving query performance and data integrity.
- Managed 100+ interns, created GitHub Organization, configured Slack, evaluated skills, and assigned cross-functional teams.
- Mentored 10 backend developer interns delivered drag and drop pricing modules, email workflows, and production bug fixes.
- Automated intern lifecycle management using Google Apps Script, Google Sheets, and Google Forms.

Infrastructure Management Associate | Accenture Inc.

June 2023 – June 2024

- Improved deployment efficiency by 20% via automation scripts on JBoss/Apache Tomcat across 50+ production servers.
- Collaborated across Linux, Windows, and Cloud infrastructure teams to diagnose and resolve system level issues across 50+ production servers, maintaining high availability and SLA compliance.
- Performed log analysis, root cause analysis (RCA), and debugging using Linux command line tools, strengthening troubleshooting skills applicable to full stack CI/CD build pipelines.
- Managed L2/L3 application incidents via ServiceNow (SNOW), ensuring minimal system downtime and adherence to enterprise SLA standards.

PROJECTS

SkillFlow | MERN Stack | React.js, Node.js, MongoDB, Tailwind CSS, Gemini API

<https://skill-flow-tau.vercel.app/>

- Built a responsive LMS using React.js, Node.js, MongoDB, Tailwind CSS and Zustand with JWT authentication and role-based learning workflow.
- Developed reusable dashboard, roadmap, course and quiz components with paginated data views and REST API integration.
- Implemented YouTube learning-progress tracking and certificate previews using browser Blob APIs.
- Integrated Google Gemini to generate personalized learning roadmaps and adaptive quizzes
- GitHub: <https://github.com/krishnabackup/SkillFlow.git>

KERALAIM – AI-Powered Citizen Platform | React Native, Node.js, TypeScript, Express.js, MongoDB, LLM

- Developed an AI powered civic platform for government scheme discovery, complaint management, disaster alerts and citizen assistance
- Built an LLM powered recommendation engine that extracts eligibility criteria from unstructured government documents and matches citizens with relevant schemes.
- Implemented AI based complaint classification, urgency detection and automated department routing with cloud image uploads.
- Designed a dynamic eligibility questionnaire with intelligent follow-up prompts to gather missing user data and improve recommendation accuracy.
- Integrated dynamic eligibility questionnaires, real time location services, push notifications, weather APIs and AI chatbot capabilities.
