

KRISHNA DARSH E K

AI/ML Engineer | Python | Machine Learning | Deep Learning | AI Applications

krishnadek2002@gmail.com | +91 7902388465 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

AI/ML focused software engineer with an MCA specialization in Artificial Intelligence & Machine Learning and hands on experience across machine learning, deep learning and AI powered application development. Experienced in Python, scikit learn, NumPy, model evaluation and LLM integration, with additional full stack experience using React.js, Node.js, PostgreSQL and MongoDB. Built projects spanning healthcare prediction, medical image classification and AI powered civic assistance.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Machine Learning: scikit-learn, NumPy, Pandas, Machine Learning Algorithms, Classification, Model Evaluation, Feature Engineering

Deep Learning: CNN, Image Classification, Deep Learning

AI / GenAI: LLM Integration, Google Gemini API, Prompt Engineering, AI Application Development

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn

Backend: Node.js, Express.js, REST APIs

Databases: PostgreSQL, MongoDB, MySQL

Tools & Cloud: Git, GitHub, Docker, Linux, GCP

WORK EXPERIENCE

AI/ML Intern | [AD Infocom Systems](#)

Jan 2026 – May 2026

- Completed a three month internship in Artificial Intelligence and Machine Learning, working through ML modules and project based tasks.
- Applied Python based data analysis and machine learning workflows including data preparation, model training and evaluation.
- Gained hands on exposure to machine learning and deep learning workflows through project implementation and model experimentation

Infrastructure Management Associate | [Accenture Inc.](#)

June 2023 – June 2024

- Improved deployment efficiency by 20% by developing and maintaining automation scripts on JBoss and Apache Tomcat application servers.
- Collaborated across Linux, Windows, and Cloud infrastructure teams to diagnose and resolve system-level issues across 50+ production servers, maintaining high availability and SLA compliance.
- Performed log analysis, root cause analysis (RCA), and debugging using Linux command-line tools, strengthening troubleshooting skills applicable to full stack CI/CD build pipelines.
- Managed L2/L3 application incidents via ServiceNow (SNOW), ensuring minimal system downtime and adherence to enterprise SLA standards.

PROJECTS

KERALAIM – AI-Powered Citizen Platform | [React Native](#), [Node.js](#), [Express.js](#), [MongoDB](#), [LLM](#)

- Developed an AI powered civic platform for government scheme discovery, complaint management, disaster alerts and chatbot for assistance.
- Built an LLM powered recommendation engine that extracts eligibility criteria from unstructured government documents and matches citizens with relevant schemes.
- Implemented AI based complaint classification, urgency detection and automated department routing with cloud image uploads.
- Designed a dynamic eligibility questionnaire with intelligent follow up prompts to gather missing user data and improve recommendation accuracy.
- Integrated dynamic eligibility questionnaires, real time location services, push notifications, weather APIs and AI chatbot capabilities.
- GitHub: <https://github.com/krishnabackup/Keralaim.git>

Pneumonia Prediction from Chest X-Rays | [Python](#) | [Deep Learning](#) | [Computer Vision](#)

- Developed a deep learning image classification pipeline using PyTorch and ResNet18 to detect pneumonia from chest X ray images.
- Performed dataset validation, exploratory analysis and image preprocessing before training and validation.
- Implemented model training, validation and prediction workflows for classifying unseen chest X ray images.
- GitHub: <https://github.com/krishnabackup/Heart-Disease-Prediction-using-ML.git>

Heart Disease Prediction — Machine Learning | [Python](#) | [scikit-learn](#) | [Machine Learning](#)

- Developed a machine learning classification pipeline using the Cleveland heart disease dataset and compared Logistic Classifier, Random Forest and CatBoost model
- Compared Logistic Regression, Random Forest and CatBoost classifiers on the Cleveland heart disease dataset, CatBoost achieved 90.16% accuracy, 92.86% recall, 89.66% F1-score and 0.963 AUC.
- GitHub: <https://github.com/krishnabackup/Pneumonia-prediction-from-Xray-using-Deep-Learning.git>

EDUCATION

MCA – Artificial Intelligence & Machine Learning – CGPA 9.68 | [SRM University, Chennai](#)

July 2024 – July 2026

BSc Computer Science – CGPA 9.26 | [St. Joseph's College, Devagiri, Calicut](#)

June 2020 – June 2023
